REQVIO / DEMO RUBRIC

Study Habits & Academic Performance

Proposal review instructions

Use this fictional classroom rubric to review the matching research draft. Each criterion is a separate requirement. This is a demonstration rubric, not a validated assessment instrument.

R1 / Research problem and rationale / 15 points

State a focused research problem about the relationship between study habits and academic performance among senior high school students. Explain why the proposed study matters.

R2 / Objectives and research questions / 15 points

Provide one general objective, at least two specific objectives, and at least two research questions. Define the study-habit measures and the academic-performance measure.

R3 / Methodology and sampling / 25 points

Identify the research design, target population, intended sample size, sampling method, inclusion criteria, and recruitment procedure. Explain how participants will be selected.

R4 / Instrument and data collection / 15 points

Describe the questionnaire and collection procedure. Include at least three example items and explain how the instrument will be checked for clarity before use.

R5 / Ethics and data protection / 20 points

Explain informed consent, any required guardian consent for minors, voluntary participation, withdrawal, confidentiality, access controls, and a defined data retention and deletion period.

R6 / Analysis, limitations, and sources / 10 points

Describe how the variables will be analyzed, identify at least two study limitations, and cite at least two real academic sources using a consistent reference style. Do not claim that correlation proves causation.
